

Huperzia (syn: Lycopodium) goebelii (Lyco12b)

Huperzia (syn: Lycopodium) goebelii

€ 25.45

Huperzia goebelii is quite distinct from other types of Huperzia because of its turquoise colour. It is found in the wild in Indonesia and Malaysia where it is relatively uncommon. It can reach a length in excess of two metres. Its unusual appearance, size and silver sheen make Huperzia goebelii a highly prized addition to any collection of tropical plants.

Plant type:

evergreen

foliage plant

Place:

indoor

Adult width:

40 cm

Light:

no direct sun

Watering:

normal

Araflora info

none

Flower period:
all year

Temperature winter:
15 °C

Product:
plant

Plant type:
foliage plant

Growth habit:
creeping

Growth habit:
hanging

Properties:
giant

Properties:
limited

Growth rate:
slow

Araflora info:
limited

Natural habitat:
North-East Asia

Altitude range:
0-1000 m

Plantcare

Huperzia goebelii grows best in a warm and humid environment at temperatures between 15? C and 30? C. It needs watering only when the substrate has become fairly dry. It must not be left standing in water. Pebbles mixed with peat or sphagnum will facilitate good drainage. Fresh air circulating around the plant will protect it from infection. Huperzia goebelii needs plenty of light but should not be exposed to direct sunlight or it will become dehydrated. This plant should not be pruned.

Care:
easy

Place:
indoor

Place:
artificial lighting

Light:
no direct sun

Light:
semi sun

Fertilize:
medium

Maintenance:
no-pruning

Watering:
normal

Watering tips:
free draining mixture

Air humidity at day:
60-90%

Air humidity at night:
80-100%
