

## Philodendron x 'Pluto Red' (Ariods333)

Philodendron x 'Pluto Red'

€ 95.00

The popular Philodendron x 'Pluto Red' owes its name to the fact that its young leaves tend to have a bright red color. As the plant gets older, these leaves will turn into (dark) green. Like other Philodendrons, this variety is easy to take care of. A beautiful addition to your collection!

Natural habitat:

South America

Altitude range:

0-1500 m

## Plantcare

Philodendrons are fairly easy to take care of. When the first few centimeters of the soil feel dry, it's time to water the plant again. Be careful not to overwater the plant as this may cause the root to rot. It wouldn't hurt mist the plant a few times a week during the drier months to stay on top of the humidity. The Philodendron 'Pluto x Red' would do well in partial shade. Just make sure you don't put in direct sunlight.

Care:  
very easy

Place:  
indoor
