### Product info

The Syngonium is a plant which is originally from the rainforests of Mexico and South America. The plant has been cultivated many times, that's why you can find many different sorts of beautiful Syngonium. The Batik is one of them! The name references the Indonesian color dye which is used to decorate clothing and garments. The Batik carries this name because of the remarkable, light veins running through its leaves.

Natural habitat:

South America

Altitude range:

0-1500 m

## Plantcare

The Syngonium x Batik is a plant that's low in maintenance and can be best put in half shade so it receives indirect sunlight. The best method to check if the plant needs water is to check if the first few centimeters of the soil feel dry. Make sure the soil is well-draining and it won't hurt the Batik to mist it every once in a while.
