

Anthurium decipiens (Ariods342)

Anthurium decipiens 'starter'

€ 55.00

These sort of plants really get us hyped up here at Araflora.. The leaves of this Anthurium decipiens can grow to be no less than 2 meters long! A big share of the newly imported Anthuriums will be used for cultivating, but there will definitely be some up for sale in our webshop. Don't sleep on this impressive plant from Colombia: before you know it, it won't fit in the delivery van anymore! P.S. The impressive photo we used is (unfortunately) not ours. We can only dream of taking such an amazing picture as this! We tried to look for the rightful owner of the picture but couldn't find them. If you are or know the owner of this picture: please contact us! We will make sure we award you accordingly.

Product info

The Arthuriium decipiens is originally from the Colombian Andes. The Anthurium is part of the Aroid-family and this plant was called Anthurium salgarense up until 2019. The dark green leaves have a glossy look and a very nice texture. In some time, you can also expect this plant to grow some beautiful flowers. Since the leaves can grow up to 2 meters long, this plant is a true must have for any plantlover!

Natural habitat:
South America

Altitude range:
0-1500 m

Plantcare

Even though the Anthurium decipiens is quite big, it's an easy plant to take care of. The plant thrives best in indirect sunlight. It's important to keep the soil moist but be careful not to overwater it. This can cause the root to rot. Give it some plant nutrition once a month and your Anthurium will be perfectly happy!
