

Tropical pitcher plant ‰Nepenthes x ventrata‰; ‰;L‰; (CarniNep86) Nepenthes x ventrata ‰;L‰;

€ 17.44

Nepenthes x ventrata is a natural hybrid involving two parent species: *Nepenthes ventricosa*, a lowland species, and *Nepenthes alata*, a highland species. *Nepenthes x ventrata* is extremely popular, not least because it is relatively easy to grow indoors. Its green pitchers turn red when exposed to sunlight, making an exotic and interesting spectacle. The plant supplied by Araflora is a large example of the species.

Plant type:

carnivorous

Place:

indoor

Adult width:

<80 cm

Light:

no direct sun

Watering:

high

Araflora info

Product info

Nepenthes x ventrata can easily grow into full-sized carnivorous plant of 2 metres. It can be grown in a hanging basket or a free-standing pot, but in either case the pitchers must have sufficient space. In such conditions, the plant will grow at a normal rate. When it blooms, *Nepenthes x ventrata* produces a cluster of yellowish brown flowers

Height:

15 cm

Width:

10 cm

Adult height:

>200 cm

Adult width:

<80 cm

Flower colour:

yellow/brown

Flower period:

all year

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:

botanical

Growth rate:

normal

Araflora info:

Natural habitat:

South-East Asia

Altitude range:

100-1500,

Plantcare

Nepenthes x ventrata requires a high level of humidity in order to form healthy pitchers. It needs to be kept damp with rainwater or distilled water in a well-drained medium. It likes bright, indirect sun. In the warmer summer months, it can be moved outdoors, when care must be taken to ensure it has sufficient water. It requires a daytime temperature between 15 and 25 degrees Celsius with cool, humid nights. The temperature should never be lower than 10 degrees Celsius or higher than 30 degrees. It prefers slightly acidic peat as a growing medium and can be pruned if it becomes too large.

Care:
easy

Place:
indoor

Light:
no direct sun

Light:
full light

Artificial light height:
10-40cm

Fertilize:
none

Maintenance:
can be pruned

Watering:
high

Watering tips:
free draining mixture

Watering tips:
water spraying

Air humidity at day:
60-100%

Air humidity at night:
80-100%

Air movement:
normal

Day temperature
15-25°C

Night temperature
10°C

Temperature max:
30°C

Soil ph:
< 7

Soil type:
peat

Repotting:
after 2 years
