

Philodendron nangaritense (Ariods367)

Philodendron Fuzzy Petiole (syn. *P. nangaritense*, *P. asparatum*)

€ 45.00

This Philodendron Fuzzy Petiole (also known as the Philo. nangaritense or Philo. asparatum) is one you don't see very often! This rare species is only found in a specific part of the Ecuadorian rainforest. A truly remarkable addition to your collection!

Plant type:

evergreen

foliage plant

Place:

indoor

Adult width:

<40 cm

Light:

no direct sun

Watering:

normal

Araflora info

botanical

Product info

The Philodendron Fuzzy Petiole has green, heart shaped leaves. The leaves are glossy on top and have a matte underside. In comparison to other Philodendrons, the leaves of the Fuzzy Petiole are relatively thin. So, make sure to be a bit careful when handling this Philodendron.

Height:

50 cm

Width:

20 cm

Adult height:

>100 cm

Adult width:

<40 cm

Flower colour:

yellow

Flower period:

all year

Product:

plant

Plant type:

foliage plant

evergreen

Plant type:

terrarium

Growth habit:

climbing

Properties:

non-edible

Growth rate:

normal

Araflora info:

Natural habitat:

Amazone

Plantcare

Philodendrons are fairly easy to take care of. When the first few centimeters of the soil feel dry, it's time to water the plant again. Be careful not to overwater the plant as this may cause the roots to rot. It wouldn't hurt to mist the plant a few times a week during the drier months to stay on top of the humidity. The Philodendron Fuzzy Petiole would do well in partial shade. Just make sure you don't put in direct sunlight.

Care: normal		Place: indoor	
Place: artificial lighting		Light: no direct sun	
Light: semi sun		Artificial light height: 5-10 cm	
Fertilize: medium		Watering: normal	
Soil type: terrarium		Air humidity at night: 80-100%	
Temperature < 15 °C		Day temperature 10-30 °C	
Night temperature 12-18 °C		Temperature max: 35 °C	
Temperature min: 15 °C		Soil ph: < 5-8 >
