

## Anthurium veitchii (Ariods373)

Anthurium veitchii

€ 228.90

Anthurium veitchii is a tropical plant and member of the aroid family. This plant is mostly grown for its ribbed leaves that reach over a meter when mature. This plant originates from wet rainforests in Colombia where it grows as an epiphyte. It is suitable for greenhouse culture or as houseplant with the correct care. The plant grows well under bright indirect light, intermediate to warm conditions and an excellent draining soil.

Plant type:

foliage plant

Place:

indoor

Adult width:

<150 cm

Light:

no direct sun

Watering:

normal

Araflora info

non-edible

### Product info

Anthurium veitchii, commonly known as the king Anthurium, produces a climbing rhizome containing aerial roots. Ribbed, elongated heart-shaped leaves emerge from the end of this rhizome and could reach two meters in length when mature, but often stay shorter when grown indoors. It infrequently produces typical inflorescences similar to other members of the aroid family. While this plant is most often propagated by cuttings, sowing is also possible.

Height:

30 cm

Width:

15 cm

Adult height:

<50 cm

Adult width:

<150 cm

Flower colour:

red

Flower period:

all year

Product:

plant

Plant type:

foliage plant

Plant type:

terrarium

Growth habit:

epiphytical

Growth habit:

normal

Properties:

non-edible

Growth rate:

normal

Araflora info:

non-edible

Natural habitat:

South America

Altitude range:

0-1500 m

## Plantcare

Anthurium veitchii is relatively easy to care for when the right growing conditions are met. It demands intermediate to warm, high humidity conditions with a maximum of 30 C. Potting soil should be airy and have an excellent drainage, for example, specialized anthurium or orchid soils is used most often. Water this plant frequently but try to avoid soggy conditions. A pot with many draining holes is preferred. In warm summer months apply fertilizer every month and reduce this by half in winter.

Care: easy		Place: indoor	
Place: artificial lighting		Light: no direct sun	
Light: semi sun		Artificial light height: 20-40 cm	
Fertilize: little		Maintenance: can be pruned	
Watering: normal		Watering tips: free draining mixture	
Watering tips: water spraying		Soil type: terrarium	
Air humidity at day: 60-80%		Air humidity at night: 80-100%	
Temperature < 15 °C		Day temperature 10-30 °C	
Night temperature 12-18 °C		Temperature max: 35 °C	
Temperature min: 15 °C		Soil ph: < 5-8 >	
Soil type: peat		Repotting: after 1 year
