

Philodendron x 'caramel marble Pink' (Aroids381)

Philodendron x 'caramel marble Pink';

€ 1,400.00

Philodendron x 'caramel marble pink' is a hybridized tropical plant from the aroid family. This plant is mostly grown for its leaves. Unlike the 'variegated' form, the patterns of this variety are deep caramel colored when mature. The narrowed leaves grow up to 60 cm in length and have undulated leaf edges. Provide Philodendron x 'caramel marble pink' with a warm and humid environment with bright indirect light.

Product info

Philodendron x 'caramel marble pink' is a hybridized aroid which originates from several species within the genus Philodendron. It grows as a climbing plant at an older age. From its rhizome, it sprouts several leaves at the top and aerial roots in between older leaves. When leaves develop, several marbled spots show on the leaves. Unlike the 'variegated' varieties, the color of the spots is deep caramel to darker yellow. The leaves of this plant grow to approximately 60 cm in length and show an undulating leaf margin. Philodendron x 'golden saw' rarely flowers but could produce an insipid aroid like inflorescence, similar to other species within the genus Philodendron. Rhizome cuttings are the most optimal way of propagation, which could be rooted in airy moist soil or water.

Height: 25 cm		Width: 15 cm	
Adult height: >100 cm		Adult width: <70 cm	
Flower colour: red		Flower period: all year	
Product: plant		Plant type: foliage plant	
Growth habit: normal		Properties: non-edible	
Growth rate:			

slow

Araflora info:
no shipping

Altitude range:
0-1500 m

Araflora info:
giant

Natural habitat:
South America

Plantcare

Provide Philodendron x 'caramel marble pink' with warm temperatures between 16 and 30 degrees Celsius. For optimal growth make sure that humidity is high as possible with a preferably above 70%. Due to its size and care, this plant is most commonly grown in warm living rooms and greenhouses. Pot this plant in humus rich soils that have good draining properties. Make sure that Philodendron x 'caramel marble pink' never dries out but prevent swampy conditions of the soil. Misting and cleaning the leaves with a damp cloth could optimize growth for this species. As this plant matures, structural support could be needed to guide the climbing growth habit of this plant. Provide this species with direct sunlight in mornings or evenings, or bright indirect light as for optimal conditions. Fertilize this plant with nutrition for green plants, half the recommended dosage on a monthly basis.

Care:
very easy
