

Philodendron mamei (Aroid347)

Philodendron mamei

€ 45.00

Like Philodendron gloriosum and 'Philodendron plowmanii' (an unpublished name), this is an Aroid growing on the shadowy forest floor of Ecuador. As a houseplant this Philodendron mamei will need an open pot for its stem to grow. Unlike the other two species Philodendron mamei is relatively smaller and more manageable. Add to this the beautifully speckled leaves with the blue undertones and you have a winner!

Plant type:

foliage plant

Place:

indoor

Adult width:

<40 cm

Light:

no direct sun

Watering:

normal

botanical

Product info

The Philodendron Mamei is a very low maintenance plant which is originally from Ecuador. The Philodendron is a very popular indoor plant. The Philodendron mamei distinguishes itself by its deep veins which give the leaves a nice texture. The plant can also be used for air purifying purposes.

Height:

20 cm

Width:

8 cm

Adult height:

>100 cm

Adult width:

<40 cm

Flower colour:

yellow

Flower period:

all year

Product:

plant

Plant type:

foliage plant

Growth habit:

climbing

Properties:

non-edible

Growth rate:

normal

Araflora info:

botanical

Natural habitat:

Amazon

Plantcare

The Philodendron mamei is a very easy indoor plant that thrives in a sun filled room. It's better not to put the mamei in direct sunlight because it may cause the leaves to get a slightly bleached look. The best method to check if the plant needs water is to check if the first few centimeters of the soil feel dry. This will probably amount in the mamei needing water around once a week. In colder months once every two weeks will be enough. It wouldn't hurt to sprinkle some water on its leaves a few times a week to stay on top of the humidity your Philodendron needs.
