

Bladderwort 'Utricularia blanchettii' 'Chapada Diamantina' (Carnivorous)

€ 8.23

The bladderwort *Utricularia blanchettii* probably has one of the most beautiful inflorescence of all the *Utricularia* species. Protruding high above the ground from strong flower stalks, they have purple petals with dark veins. What makes the *Utricularia blanchettii* 'Chapada Diamantina' so special, is its ability to have dozens of flowers blossom simultaneously. The variation 'Chapada Diamantina' originates from its namesake, the Chapada Diamantina nature reserve in Brazil.

Product info

Utricularia blanchettii 'Chapada Diamantina' is an extraordinary variation naturally found in the state Bahia in the east of Brazil. It's a bladderwort of medium size with striking colourful flowers. The top petals have dark purple lines. A yellow spot is centralized on the white lip. The flowers grow in large amounts on slightly curled green stalks, high above the foliage. In the wild, the *Utricularia blanchettii* 'Chapada Diamantina' makes its home on stones and other plants.

Plantcare

Utricularia blanchetii 'Chapada Diamantina' is easy to take care of. The bladderwort requires a spot with plenty of light, but should be kept away from direct sunlight. It's recommended to keep this species in a terrarium, as it needs a humidity of 80% and temperature of 25°C to truly thrive. It could also be placed in a humid spot on the windowsill. *Utricularia blanchetii* 'Chapada Diamantina' needs a water permeable soil, like a mixture of peat moss and perlite. You can find these components in our 'Plant Accessories' section. Keep this substrate moist and regularly put it under a layer of water.
