

## Bladderwort &#039;Utricularia longifolia&#039; (Carniutr27) Utricularia longifolia

€ 13.08

Bladderwort usually has quite a modest size. Utricularia longifolia is an exception here, as its name might suggest. The leaves of this carnivore are elongated, making them look like the leaves of a fern. Above this you will find beautiful purple flowers with a yellow spot in the centre, growing from a large, slender stem. We also offer Utricularia longifolia in this large size.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

botanical

### Product info

Utricularia longifolia originates from the tropical rainforests of Brazil, where this species grows upon trees and rocks. Compared to other bladderwort, this plant is a giant. This is definitely a good thing though, as it emphasizes its amazing purple flowers even more. The flowers look much like the flowers of an orchid and they have a yellow spot on the top. They grow in small clusters from long flower stalks, making Utricularia longifolia even more special.

Height:

7 cm

Width:

5 cm

Adult height:

5-10 cm

Adult width:

10 cm

Flower colour:

white

Flower period:

Jan-July

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:

special

Growth rate:

normal

Araflora info:

botanical

Natural habitat:

North America

Altitude range:

0-500 m

## Plantcare

Utricularia longifolia is a real all-rounder when it comes to habitat. It can be attached to rocks, branches or bark, but even in soil with its roots underwater will make this plant happy. The ideal substrate would be a mixture of peat moss and perlite or pumice. You can find this and other components in our 'Plant Accessories' section. Utricularia longifolia is known to be a fast growing plant and needs a lot of sunlight and water. Make sure the substrate doesn't dry, so be aware of direct bright sunlight. It needs a temperature around 25°C.

Care: normal		Place: indoor	
Place: artificial lighting		Light: full light	
Artificial light height: 0-20cm		Fertilize: none	
Maintenance: prune dead stalks		Watering: high	
Watering tips: standing in water		Watering tips: no-water spraying	
Air humidity at day: 60-100%		Air humidity at night: 80-100%	
Air movement: normal		Temperature 15°C	
Day temperature 15-25°C		Night temperature 10-20°C	
Temperature max: 30°C		Soil ph: < 7	
Soil type: peat		Repotting: after 2 years
