Height: 3 cm		Width: 4 cm	
Adult height: 5-10 cm		Adult width: 10 cm	
Flower period: Jan-July		Product: plant	
Plant type: carnivorous		Growth habit: normal	
Properties: special		Growth rate: normal	
Araflora info: introduction		Natural habitat: North America	
Altitude range: 0-500 m			

Plantcare

The *Pinguicula primuliflora* can be kept indoors as well as on a balcony or terrace as long as the temperature stays above 5° Celsius [41° F]. This carnivorous plant likes to be in a light spot but also does well in half shadow. The soil of the *Pinguicula primuliflora* should be really wet. Therefore always place the container of this plant on a saucer filled with water. Rain water is best but the plant also does well on tap water. The soil should contain only few nutrients, so a mix of sand and peat is excellent. It is not necessary to feed this plant extra insects since it is very effective in catching its own insects. Moreover it makes very economical use of its nutrients.

Care: normal		Place: indoor	
Place: artificial lighting		Light: full light	
Artificial light height: 0-20cm		Fertilize: none	
Maintenance: prune dead stalks		Watering: high	
Watering tips: standing in water		Watering tips: no-water spraying	
Air humidity at day: 60-100%		Air humidity at night: 80-100%	
Air movement: normal		Temperature 15°C	
Day temperature 15-25°C		Night temperature -10-20°C	
Temperature max: 30°C		Soil type: peat	
Repotting: after 2 years
