Araflora info:
limited

Natural habitat:
South-East Asia

Altitude range:
0-1500 m

Plantcare

Begonia bipinnatifida likes a moderate warmth and a high humidity, making it a good fit for the terrarium. This Begonia can also be kept in the living room provided there is sufficient light and a high humidity. Make sure the soil is kept a bit moist. Using lukewarm water is recommended. Large fluctuations in temperature can lead to loss of leaves.

Care: difficult		Place: indoor	
Place: artificial lighting		Light: semi sun	
Light: artificial lighting		Artificial light height: 20-40 cm	
Fertilize: little		Maintenance: prune dead stalks	
Watering: normal		Watering tips: watering from above	
Soil type: terrarium		Air humidity at day: 60-80%	
Air humidity at night: 60-80%		Air movement: No-air movement	
Temperature < 15 °C		Day temperature 10-30 °C	
Night temperature 12-18 °C		Temperature max: 30 °C	
Temperature min: 15 °C		Soil type: peat mix	
Repotting: after 2 years
