

Sundew 'Drosera admirabilis' (CarniDr02)

Drosera admirabilis

€ 8.05

The Drosera admirabilis is a remarkable carnivorous plant from the sundew family. It has rosette-shaped, succulent (fleshy) leaves, from which grows a rolled flower stalk, which looks like a tongue. These characteristics give Drosera admirabilis an even more animal-like appearance. Suitable for use on the windowsill or in a terrarium.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

introduction

Product info

The Drosera admirabilis originates from South Africa. Because of its subtropical origin, this sundew does not need to hibernate. It grows quickly and up to 10 cm. Like other members of the sundew family, it catches insects with the sticky tentacles on its leaves.

Height:

3 cm

Width:

4 cm

Adult height:

5-10 cm

Adult width:

10 cm

Flower period:

Jan-July

Product:

plant

Plant type:

carnivorous

Growth habit:

normal

Properties:

special

Growth rate:

normal

Natural habitat:

South Africa

Altitude range:

0-500 m

Plantcare

The *Drosera admirabilis* grows best in a peat-perlite mix or pure sphagnum (peat moss). Keep the plant indoors in a warm place with plenty of sunlight and leave a dish of water under the pot so the roots stay wet.
