Natural habitat:  
South Africa

Altitude range:  
0-500 m

## Plantcare

The *Drosera aliciae* can take a lot. It grows best in a peat-perlite soil mixture or pure sphagnum (peat moss). This carnivorous plant can grow well in a terrarium, but can also thrive on the windowsill. If exposed to enough sunlight, it will change to a beautiful red colour. If its leaves are occasionally visited by an insect, the *Drosera aliciae* will bloom with flowers. These *Drosera* can tolerate higher temperatures, provided that the humidity is high enough (60-70%).

Care: normal		Place: indoor	
Place: artificial lighting		Light: full light	
Artificial light height: 0-20cm		Fertilize: none	
Maintenance: prune dead stalks		Watering: high	
Watering tips: standing in water		Watering tips: no-water spraying	
Air humidity at day: 60-100%		Air humidity at night: 80-100%
