

## Sundew 'Drosera burmannii' (CarniDr12)

Drosera burmannii

€ 0.00

The *Drosera burmannii* is a carnivorous plant from the sundew family. It's recognised by its triangular trap leaves and its long snap tentacles. This 'catapults' the prey into the trap leaf. *Drosera burmannii* can be kept on a windowsill or in a terrarium.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

introduction

Natural habitat:

Australia/ New Zealand

Altitude range:

0-500 m

## Plantcare

The *Drosera burmannii* grows best in a standard peat-perlite mix. This *Drosera* is tropical and therefore requires high humidity. It is an annual plant, and dies after flowering and seed production. If desired, new plants can be grown again from the seeds.

Care: normal		Place: indoor	
Place: artificial lighting		Light: full light	
Artificial light height: 0-20cm		Fertilize: none	
Maintenance: prune dead stalks		Watering: high	
Watering tips: standing in water		Watering tips: no-water spraying	
Air humidity at day: 60-100%		Air humidity at night: 80-100%	
Air movement: normal		Temperature 15°C	
Day temperature 15-25°C		Night temperature 10-20°C	
Temperature max: 30°C		Soil ph: <7	
Soil type: peat		Repotting: after 2 years
