

## Sundew †; Drosera filiformis ssp filiformis †; (CarniDr31)

Drosera filiformis ssp filiformis

€ 10.90

The Drosera filiformis ssp filiformis is a carnivorous plant from the sundew family. Its long, thin trap leaves unfold from the core of the plant. This plant can be kept on the windowsill, but also outside.

Plant type:

carnivorous

Place:

indoor

Adult width:

10 cm

Light:

full light

Watering:

high

Araflora info

introduction

### Product info

The Drosera filiformis ssp filiformis originates from North America. It has long tentacle-like leaves that can grow up to 30 cm long. In the winter this type takes a rest period by forming a winter bud of densely rolled leaves. In spring filiformis Drosera filiformis again starts producing the long leaves.

Height:  
3 cm

Width:  
4 cm

Adult height:  
5-10 cm

Adult width:  
10 cm

Flower period:  
Jan-July

Product:  
plant

Plant type:  
carnivorous

Growth habit:  
normal

Properties:  
special

Growth rate:  
normal

Natural habitat:  
North America

Altitude range:  
0-500 m

## Plantcare

The *Drosera filiformis* ssp *filiformis* thrives in a mixture of peat and perlite, and needs to always stay moist. During winter, the plant can be kept in a cool, sheltered place. If the end of the trap leaves start to curl during the growing season, it means that the plant is too wet.

Care: normal		Place: indoor	
Place: artificial lighting		Light: full light	
Artificial light height: 0-20cm		Fertilize: none	
Maintenance: prune dead stalks		Watering: high	
Watering tips: standing in water		Watering tips: no-water spraying	
Air humidity at day: 60-100%		Air humidity at night: 80-100%	
Air movement: normal		Temperature 15°C	
Day temperature 15-25°C		Night temperature -10-20°C	
Temperature max: 30°C		Soil type: peat	
Repotting: after 2 years
